

# E-TIME DEMO PREMIUM

Try out the new working time planning model

## WOULD YOU LIKE TO:

- streamline working time planning?
- reduce the time needed to create work schedules to just a few minutes?
- increase the satisfaction of your HR team and all employees?

## E-TIME DEMO PREMIUM

allows you to test an advanced working time planning solution [All for One E-Time](#):

- for free
- with no commitments
- using your real data
- with support from a consultant

## WHO IT'S FOR

The E-Time Demo Premium is designed for large organizations interested in optimizing working time planning for at least 500 employees. We assume that decision-makers from your HR department will be involved in testing the solution.

## ELIGIBILITY

We kindly ask you to complete a [needs assessment survey](#). Please also provide our sales representative with information about the individuals who will be involved in the testing process. On this basis, we will determine eligibility for the E-Time Demo Premium. Afterwards, we will jointly agree on the start date for testing.

## WHAT WE PROVIDE

- Preparation of a dedicated test instance of E-Time for your company
- 3 months of free access
- Parameterization of settings (e.g., working hours, billing periods, validation rules)
- Ability to set up to 50 users with any roles (manager, employee, HR department), divided into any number of teams
- Data import template
- Support from a dedicated consultant during the testing process

## TESTING STAGES

1

Launch: a two-hour online session with an E-Time consultant, determining the configuration and format for preparing data for import. Based on this, we will prepare a customized Demo Premium instance for you and we will import data to it

2

Run: a pool of 3 hours for online meetings with a consultant during your use of Demo Premium. This is an opportunity to ask questions and jointly explore the capabilities of E-Time

3

Finish: a two-hour online session summarizing the findings of the E-Time testing - with the participation of an E-Time consultant from our side and your account manager

## IMPLEMENTATION

Once testing is complete, if you wish, we will prepare an offer for the implementation and subscription of All for One E-Time.
